

Track almost any sample in the lab

B-7425 laboratory label

The B-7425 laboratory label is an excellent solution to track samples. It is designed to stay attached and remain legible in a wide range of sample collection, sample processing, microbiology and cryogenic applications.

An all-round laboratory label

- stays attached in liquid nitrogen, freezers, hot water baths, autoclaves
- remains legible when exposed to laboratory chemicals including DMSO, Xylene, IPA, ethanol
- ideal to identify vials, tubes, slides, well plates and other specimen containers made out of glass, stainless steel or polypropylene
- can be printed in the lab with Brady's portable printers and a selection of benchtop printing systems

Print on-site

The B-7425 laboratory label can be printed by Brady in line with your specifications. The label can also be printed on-site in any laboratory with Brady printers including BMP21-LAB, BMP51, BMP61, BMP71, BBP12, BradyPrinter M611, BradyPrinter i3300, BradyPrinter i5100, BradyPrinter i7100 and BradyJet2000. For optimal performance, it should be printed with the R6400, R4300 or R6200 ink ribbons.

B-7425 Vial/tube labels

Brady's vial and test tube labels are designed to withstand extreme laboratory solvents like Xylene, Ethanol, Alcohol and DMSO, ensuring that the specimen identification is always legible - and will not smear, fade or fall off.

B-7425 Well plate labels

When total tracking of all sample collections is required then Brady has a solution for Well plate identification. Our well plate labels guarantee crystal clear text and barcoding for most lab environments.

B-7425J Bottles/flasks & dishes

Brady's labels for bottles, flasks and dishes are easy to handle and flexible. This enables the labels to be placed on curved containers and remain attached and legible, even after being subjected to freezing, liquid nitrogen and heat.

B-7425 Centrifuge / Microcentrifuge Labels

When applying a self-laminating label, we recommend you avoid touching the adhesive side of the label when wrapping it around a vial or tube, to ensure maximum adhesion.
